Professional Experience

Junior Software Engineer | Digital Processing Systems Kuwait

August 2023 – Present | Salmiya, Kuwait

Selected assignments at DPSKW

Department of Legal Advice and Legislation (FATWA) | Dec 2023–Aug 2025

- Developed business automation using Blue Prism and Python with Selenium.
- Managed a major part of the archiving operation, including its databases and systems.
- Monitored and supported the archiving workflow to keep daily operations running smoothly.

DPS Internal Workspace | Aug–Nov 2025

- Independently designed and built a full-stack internal workspace application for DPS.
- Built a Jira-like platform to support team work and project coordination.

Flowable Workflow Integration | Dec 2025–Apr 2026

- Served as the dedicated Flowable resource, responsible for the workflow engine, backend routing, and process flows.
- Integrated Flowable workflows with the Liferay user interface and coordinated with the Liferay frontend team.
- Worked with the webMethods team on API integration between the workflow engine and connected systems.

Warba Insurance and Reinsurance Company | May 2026–Present

- Develop and maintain Selenium automation for two motor lines of business, covering the business workflows and requirements of both lines.
- Coordinate with the team to keep automation behavior aligned with databases and related systems across those workflows.
